## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-3 are allowed.
2. The following is an examiner's statement of reasons for allowance: 
  - With respect to claim 1 the Prior Art does not disclose a force-applying input device with first and second angular speed calculating units, where the first calculating unit calculates speed based on a signal pulse output from an encoder and the second calculating unit calculates speed based on angular acceleration; a rotational speed selecting unit that selects either the speed calculation from the first calculating unit or the second calculating unit, where the selecting unit selects the calculation from the second calculating unit when the calculation from the first calculating unit is above a predetermined value; a rotational angle calculating unit that calculates angle information based on the speed output from the selecting unit; and a torque calculating unit that calculates torque information to apply to the torque generating unit based on the speed information output from the selector unit and the angle information output from the angle calculating unit.
3. Therefore, the Examiner acknowledges the Prior Art fails to make obvious the Applicant's claimed invention.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
